6cc18dc Daniel Loos Sun May 24 10:46:52 2015 +0200 add coffee uptake section
```

Content

1 Mental awareness correlates with coffee uptake

The mental awareness after coffee consumption increases significantly. Coefficient of determination fitting by minimizing $SS_{tot} = \sum_i y_i - \bar{y}^2$ [2] confirmed its impact on human brains ($p < 0.01$). [3]

2 Coffee and smoothies concerning longterm studies

Further studies have shown that in comparison to coffee only treatment smoothies were better hackathon motivation drinks. [1]
